

The **Sharelife Night Sky Waterproof White Twinkling Star Universe Light** is an **IP65-rated projector built for indoor and outdoor use**. It is highly favored by DJs for its dynamic effects (like slow star rotation or fast dancing strobes) and its DMX compatibility.

Review the setup, manual details, and DMX channel map below:

Channel [1, 2]	Function	Value	Description
CH 1	Star Effect / Mode	\(000 - 009\)	Blackout
		\(010 - 129\)	Strobe speed control (Slow to Fast)
		\(130 - 255\)	Dynamic rotation/twinkling effect
CH 2	Rotation Direction	\(000 - 010\)	No rotation
		\(011 - 127\)	Clockwise rotation (Slow to Fast)
		\(128 - 255\)	Counter-clockwise rotation (Slow to Fast)
CH 3	Dimmer / Brightness	\(000 - 255\)	Adjust overall brightness from dark to maximum
CH 4	Master Dimmer	\(000 - 255\)	S

You can operate this projector via four different modes using the onboard control panel or a DMX controller:

1. **AUTO Mode:** Cycles through pre-programmed star and strobe effects automatically.
2. **Sound Active Mode:** The twinkling and rotation react dynamically to the beat of your music.
3. **Master/Slave Mode:** Daisy-chain multiple units together so they perfectly mirror the primary light's performance.

4. **DMX Mode:** Connect a 3-pin XLR DMX controller for ultimate lighting synchronization. [2, 6, 7]

DMX Channel Mapping (4-Channel Chart)

 *Cautionary Note: Direct eye contact with the laser aperture must be avoided at all times. If you are using DMX outdoors, be aware that you will need a waterproof DMX adapter rather than a standard one, as standard adapters might compromise the fixture's waterproof seal. [1, 5]*

For general reference on similar DMX stage setups, browse options and retailer manuals via Ubuy France or Ubuy Nigeria.
